

Your firewall is capable. Is your operation?

NGFW operations, management, governance, optimisation, support & training

PRACTICAL SECURITY, SUSTAINED THROUGH OPERATIONS

Kowoyo Networks helps organisations get more security value from their next-generation firewalls through post-implementation operational ownership and knowledge transfer. Specialist focus: Palo Alto Networks.

Operations & management

Policy hygiene, lifecycle management, centralised administration and operational troubleshooting.

Governance & assessments

Rulebase reviews, Best Practice Assessments, Security Lifecycle Reviews and actionable findings.

Optimisation & visibility

Review and enable security capabilities according to licensing, environment and operational needs.

Support & monitoring

Traffic and log analysis, incident troubleshooting and remote-access operational support.

Technical training

Hands-on learning for engineers: policy management, inspection capabilities and repeatable reviews.

Executive education

Translate firewall findings into clear discussions about risk, governance and security investment.

DIAGNOSE / IMPROVE / SUSTAIN

Establish the operating picture. Prioritise practical improvements. Build the skills and review practices that help those improvements last.

FOUNDER EXPERIENCE

Elvis Kupara

Senior Firewall & Network Security Engineer and cybersecurity trainer.

Professional experience includes 35+ firewalls across four continents and emergency VPN support for 15,000 users. These are founder career highlights.

DELIVERY Remote and on-site technical training and executive education.
